Why Choose a Fire Rated Spy Hole?

Fire Resistant Door viewers (spyholes) are a great security accessory for your customers, as no door should be opened without first checking who is on the other side. Door security is essential to ensuring a home is safe and once quality locks have been fitted it is key to have fire resistant door viewers. Many homeowners overlook the importance of really seeing who is on the other side of the door and essentially this can be the best way to prevent unwanted guests, break-ins, and scams. Providing your customers with this important information will help them learn to better protect their homes and keep intruders out.

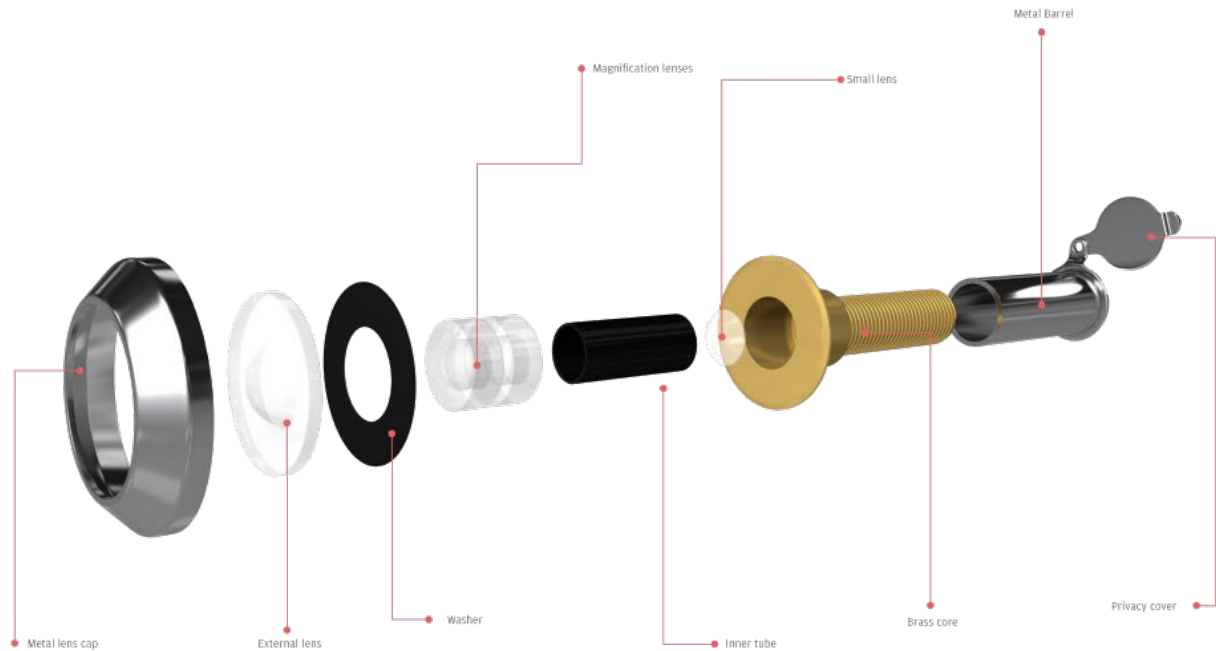

The Range

With a variety of fire check door viewers, homeowners will be able to select the viewer most suitable for their needs and overall home interior and exterior. Whatever their overall door hardware finish, there is a fire-resistant spyhole suitable to match it. Made with a solid brass body, and comprising of 3 Pyrex glass lenses, each fire-resistant spyhole ensures to give crystal clear performance for years of safe, secure use. The Fire-Resistant Door Viewers are tested to DHF TS002: 2009 standards and certified for 1-hour fire resistance, for reliable performance and to meet essential safety standards. Additionally, these viewers come with a 5-year inland guarantee. Polished brass and polished chrome viewers come with a PVD head, which helps prevent rust developing in coastal areas. Polished brass, polished chrome, and satin chrome door viewers also come with a FREE privacy cover!
