with a smooth finish

Bevelled edge makes
gripping more difficult to
pull it off

Distance between screw
holes: 38mm

Why buy UAP High Security Escutcheons?

The UAP High Security Escutcheon comes in 3 finishes - PVD Gold, Mirror Polished and Satin Stainless Steel, and has been designed to colour match with the UAP door knob in order to give perfect co-ordination to a front door. The high security escutcheon has several security features including a bevelled edge. The bevelled edge makes it a lot more difficult to grip the escutcheon with pliers in order to pull it off. Another security feature are the high tensile strength fixing bolts, which secures to the escutcheon to the door.

Benefits

Each high security escutcheon is made from high grade stainless steel, and is part of the UAP Nanocoast range. The UAP Nanocoast range of products are specifically designed for areas which are within a 25 mile radius of the coast, or within 5 miles of highly populated industrial areas, and comes with an industry first LIFETIME coating guarantee, as the escutcheon will not pit, rust or corrode no matter what environments you put them in!

The design of the high security escutcheon has been developed to be contemporary, and it also comes with a smooth finish to make any door look professional. It is suitable for all composite doors and hardwood doors.
