

Offset Pull Handle

38mm diameter for sturdier construction

Easier to grip for those with arthritis or limited hand movement

All pull handles have two fixing points with an individual plate on each

Comes with an Allen Key and 2 Allen Bolts on each of the up-stands

Made from 1.5mm 316 grade stainless steel

Each pull handle comes with a LIFETIME coating guarantee!

3 fixing methods available - hidden fixings, bolt through and back-to-back

Part of the Nanocoast Range

When designing the UAP Offset Pull Handle, we consulted with several door manufacturers during the design process to ensure our offset pull handle met the desired specifications of the majority. We also did not want to have any of the downfalls that may be present on other pull handles in the market. The first thing we decided to do was make each offset pull handle from 1.5mm thick 316 grade stainless steel and made it part of the UAP Nanocoast Range. Each offset pull handle has been salt spray tested to ASTM B117 for 2,000 hours, and comes with an industry first LIFETIME coating guarantee, as the pull handle will not pit, rust or corrode no matter what environments you put them in!

3 Different Fixing Methods

What makes the offset pull handle really stand out is the 3 different fixing methods available - hidden fixings, bolt through and back-to-back fixings. Due to the fixing methods, customers also have the option of sending the door to the site without the offset pull handle on, this will prevent damage in transit or on site. The door will simply be sent with the fixings on, and the installation would be completed on site.
