

# RED TRIANGLE ACCESSIBLE THUMB TURN LEVER GRIP

## Cylinder

Special shaped thumb turn – designed for the elderly, people with arthritis and limited hand movement

Designed to make thumb turn cylinders easier to operate

To suit Kinetica 3 Star, UAP+ 1 Star and TL Standard thumb turn Euro cylinders with a stadium shaped thumb turn

User-friendly Thumbturn, which is easier to grip

## What else is included?

The Access thumb turn has been tested with all UAP cylinders and each cylinder is packed full of security features, and is part of UAP's super smooth cylinders using the Chris Belcher designed anti-bump timing pin system. This very clever system uses nickel plated hardened steel key pins and driver pins, which gives the anti-drill feature we wanted to incorporate. The Patented timing pins are designed to interrupt the timing of the pins when bumped, and it is highly effective. And because we use special pins rather than trap pins, we do not have a high expense to get this anti-bump feature! The timing pins have inbuilt anti-picks, and mushroom driver pins, which makes them highly effective against picking.

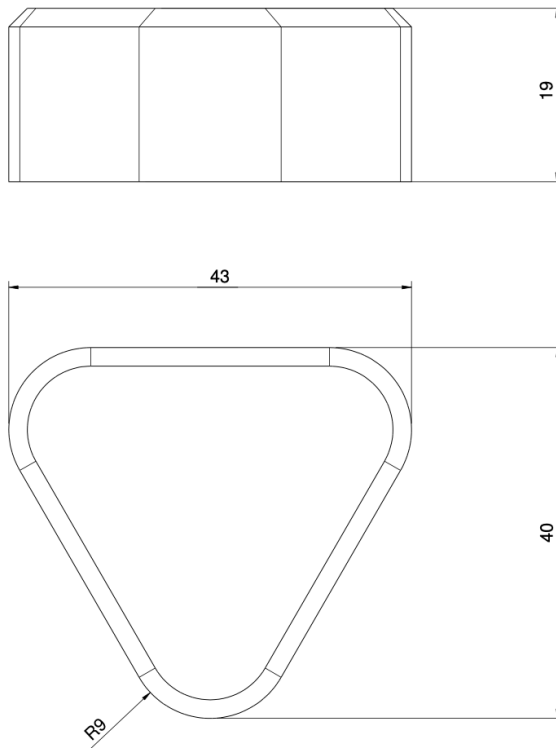

## What is a Red Triangle Accessible Thumbturn Lever Grip?

The Red Triangle Accessible Thumb Turn Lever Grip has antibacterial and antiviral properties. Each grip has been tested to ISO 22196:2011 and shown to reduce Staphylococcus aureus and Escherichia Coli. Also tested to ISO 21702:2019 and shown to reduce SARS-CoV-2, the virus that causes Covid-19, making it possible to lock and un- lock the door with a greatly reduced risk of infection transfer to anyone in your family.

## Why choose a Thumbturn Cylinder Extension?

Thumb turn cylinder extension designed to enhance accessibility for those with limited hand movement and dexterity.
