Supplied complete with strike plate

High-Performance Locking System

The Slam Shut Autolock is a high-performance locking system designed for superior security and convenience. Built on the trusted Fullex Crimebeater lock, it offers enhanced protection, making it ideal for residential and commercial applications. Its versatile design supports timber and composite doors, providing flexibility for security upgrades. The dual spindle mechanism accommodates 92mm/92mm or 92mm/62mm long backplate handles, ensuring broad compatibility. An easily reversible latch allows effortless installation for both left- and right-handed doors. This feature-rich lock meets strict fire safety standards, achieving FD30 and FD60 ratings on timber doorsets and FD30 on composite doors with intumescent kits. Supplied as a complete set with a strike plate, it is fire-rated for up to 60 minutes, ensuring compliance with safety regulations.

Built to last, the Slam Shut Autolock has been rigorously cycle tested to 50,000 full cycles, ensuring long-term durability. Its corrosion-resistant design, certified to BSEN1670 Grade 5, withstands 480 hours of harsh conditions without compromising function. Secured by Design accredited and PAS 24 compatible, it meets high-security standards to deter forced entry. Backed by a 10-year mechanical guarantee, this lock offers reliable, high-performance security for both residential and commercial use.
