- Comes with an Allen key and 2 Allen bolts
- Versatile fixing options
- Sleek and stylish design
- Ideal for all weather conditions, preventing rust and leakage
- Made from high-quality stainless steel material

Straight Slim Pull Handle

The UAP Straight Slim Pull Handle is designed for those who appreciate both style and functionality. Its sleek, modern aesthetic is achieved through a 32mm bar against a 32mm straight bar, creating a contemporary look that complements any door. Crafted from high-grade Stainless Steel 316, this handle is built to withstand harsh weather conditions, ensuring resistance to rust and corrosion. As part of the UAP Nanocoast range, it is specifically designed for use in coastal and industrial areas, making it an excellent choice for properties within 25 miles of the coast or 5 miles of industrial zones. Additionally, its 32mm diameter provides an easy-to-grip surface, ideal for individuals with arthritis or limited hand mobility.

Easy Installation

Installation is made simple with the inclusion of an Allen Key and two Allen Bolts on each upstand, offering multiple fixing options such as hidden fixings, bolt through, and back-to-back installation.

The straight pull handle stands out with **three fixing options**: hidden, bolt-through, and back-to-back. This allows doors to be shipped without handles, preventing damage. **Hidden fixings** use plates secured with screws for a seamless look. **The bolt-through** method, with a brass thread reducer and Allen bolts, ensures a strong, vibration-resistant hold. **The back-to-back** system offers quick installation while maintaining a secure connection.

Standard:

Size	Product Code	Centres
900mm	PH900S-SSS-SLIM	700mm
1200mm	PH1200S-SSS-SLIM	1000mm
