

UAP Patio Door Handle

Stainless Steel

High quality stainless steel handle

Very comfortable grip when operating

High quality finish

Tube handle gives a very comfortable grip when operating

Includes the UAP patent applied for screw alignment feature for easy fitting

About the Door Handle

Contemporary in appearance, the Patio Door Handle has a 219mm backplate and offers plenty of space to grip the handle for a more comfortable opening operation. We have made fitting the patio door handle simple with our patented screw alignment feature. This allows you to easily line the holes in the handle up with the holes in the door, and the feature will hold the screws in place while you're drilling. The handle also comes ready fitted to the backplate, but if you need to adjust the direction of the handle it can easily be removed and re fitted.

Comfortable Grip

The patio door handle has been cleverly designed to offer a very comfortable grip when operating.

High Security

It is recommended to use a UAP Kinetica 3* Kitemarked euro cylinder with the door handles in order to give you the best security. and to achieve a 3-star Kitemark status for PAS24 doors.

Handles are made from Stainless Steel

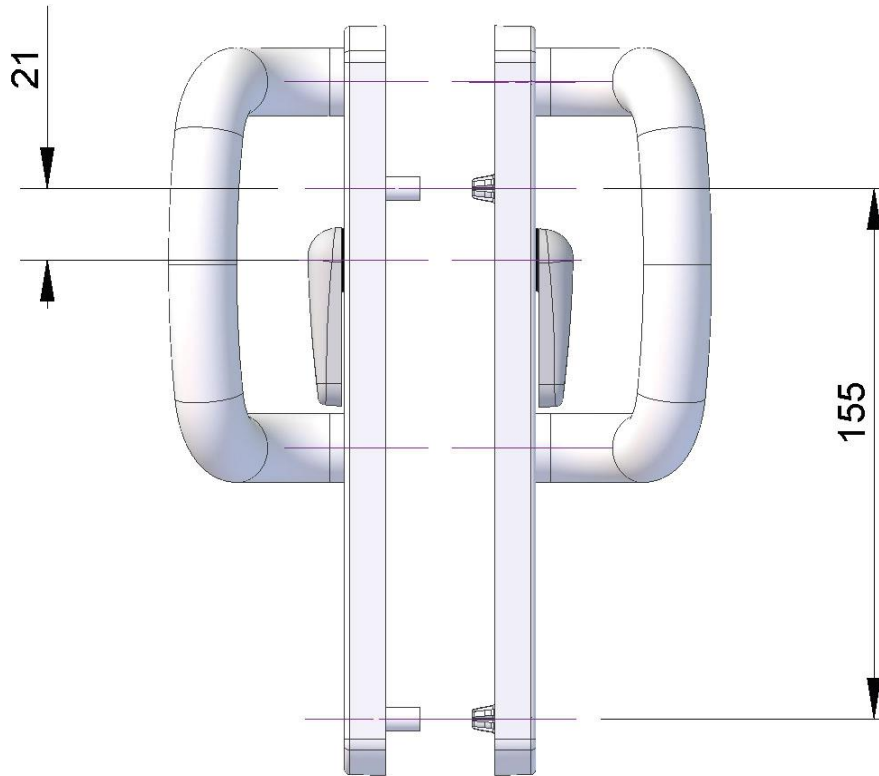

Has a 219mm long **backplate**

Tube handle gives a very comfortable grip when operating
