Description:

High viral resistance coating;

- Kills over 99% of viruses, including SARS-CoV-2 (verified in a Cat 3 testing facility)
- 100x greater at killing viruses including SARS-CoV-2 compared to stainless steel

High Anti Corrosion Performance;

- Greater than 10x times corrosion resistance in a high UV Humidity chamber compared to copper
- Greater than 10x times corrosion resistance in a Salt Spray chamber compared to copper
- 5 year warranty (internal use only)

Low Maintenance;

- Reduced cleaning requirements compared to standard stainless steel
- There are no requirements to use harsh cleaning chemicals (mild detergent if required)

Protect and enhance the longevity of your doors with our Armasmart® Push Plates, meticulously engineered for durability and style. Featuring round corners drilled and countersunk, each plate is supplied complete with screws for easy installation. With a thickness of 1.2mm, these kick plates offer robust protection against wear and tear.

Crafted from high-grade stainless steel, they ensure long-lasting performance and resistance to corrosion. Elevate the appearance and durability of your doors with Armasmart® Push Plates, the perfect combination of functionality and elegance.
