Preferred Specification

Pull grip feature for
a comfortable grip

High tensile
strength fixing bolts

Why buy UAP High Security Escutcheons with pull feature?

The UAP High Security Escutcheon with pull feature comes in 2 finishes - Mirror Polished and Satin Stainless Steel, and has been designed to colour match with the UAP pull handle in order to give perfect co-ordination to a front door.

This high security escutcheon has several security features including a bevelled edge. The bevelled edge makes it extremely difficult to grip the escutcheon with pliers in order to pull it off. Another security feature are the high tensile strength fixing bolts which are designed to secure the escutcheon firmly to the door.

What is the Pull Grip Feature?

The pull grip is simply an additional section put onto the escutcheon - designed to perfectly fit the thumb for a comfortable grip. This new feature greatly improves the functionality of the everyday escutcheon. It has been developed for user efficiency by making the operation of closing and locking the door straightforward and smoother.

Bevelled edge makes gripping more difficult to pull it off

Made from high grade Stainless Steel

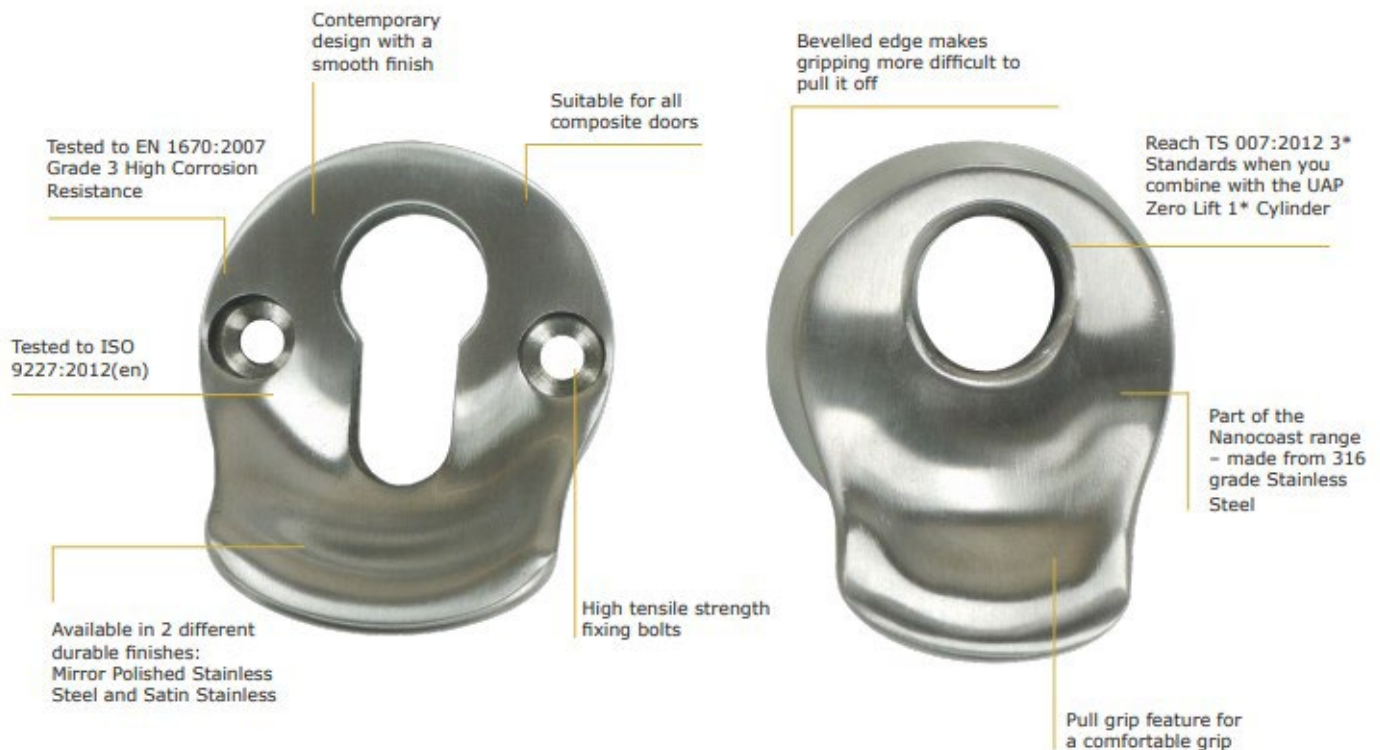

Each escutcheon comes with a LIFETIME coating guarantee!

Suitable for all composite and hardwood doors only

Product Codes:

Finish	Code	Internal Code	Material Construction
Mirror Polished	HSEMPSS-PULL-NANOCOAST	HSEMPSS-PULL-INTERNAL	Stainless Steel
Satin Stainless	HSESSS-PULL-NANOCOAST	HSESSS-PULL-INTERNAL	Stainless Steel

Benefits

Each high security escutcheon is made from 316 grade stainless steel and is part of the UAP Nanocoast range. Nanocoast products are specifically designed to not pit, rust or corrode when placed in areas exposed to the elements, particularly within a 25 mile radius of the coast or within 5 miles of highly populated industrial areas. The design of the high security escutcheon has been developed to be contemporary, and it also comes with a smooth finish to make any door look professional. It is suitable for all composite doors and hardwood .
