Each pull handle comes with a LIFETIME coating guarantee!

Made from 1.5mm high grade stainless steel

40mm x 20mm diameter for sturdier construction

3 fixing methods available - hidden fixings, bolt through and back-to-back

UAP Square Pull Handle

Each UAP Square Pull Handle is made from 1.5mm thick stainless steel, and part of the [UAP Nanocoast](#) range, and comes with an industry first LIFETIME coating guarantee, as the pull handle will not pit, rust or corrode no matter what environments you put them in!

Easy to Grip Handle

We made the pull handle have a much sturdier construction with a 40mm diameter. This also makes it easier to grip the handle, especially for people who have got arthritis or limited hand movement. So, with that said, it is a more robust type of bar. We decided against using a thinner up-stand and welding. The bolt through fixing gives a neater finish and as Stainless Steel is used, the product will not rust and so there will be no leakage if it rains. Each square pull handle comes with an Allen Key and 2 Allen Bolts on each of the up-stands. The bolts are all made from high grade stainless steel. All the pull handles have two fixing points with an individual plate on each.

3 Different Fixing Methods Available

What makes the square pull handle really stand out is the 3 different fixing methods available - hidden fixings, bolt through and back-to-back fixings. Due to the fixing methods, customers also have the option of sending the door to the site without the square pull handle on, this will prevent damage in transit or on site. The door will simply be sent with the fixings on, and the installation would be completed on site.

Available in a Satin Stainless finish
