Provides enhanced security

Available with a 22mm backset for flexible fitting options

Easy operation

Some locks may have rounded or square edges, with no impact on performance

High Security Window Lock

Espagnolette window locks offer a high level of security by firmly securing windows in place, reducing the risk of unauthorised access. Designed for ease of use, these locks operate with a simple turn of a spindle-driven window handle, ensuring smooth locking and unlocking without the need for additional effort. The inclusion of two 8mm mushroom cams provides an extra layer of protection, enhancing the lock's grip and making it significantly more resistant to forced entry. Their robust construction ensures long-lasting reliability, making them an excellent choice for both residential and commercial properties where security is a top priority. With a practical offset design, these locks are available with a 22mm backset, offering flexibility to accommodate various window types and installation requirements. Whether upgrading existing window security or fitting new windows, espagnolette window locks provide a dependable and efficient solution to enhance safety and peace of mind.

Additionally, espagnolette locks come in different edge variations, including rounded or square edges, ensuring compatibility with different window profiles without compromising performance. This thoughtful design allows for a seamless fit while maintaining a sleek and discreet appearance.
