

5 Roller Lock

Designed for PVCu doors

Dual-spindle options (92-92mm and 92-62mm)

Equipped with 5 rollers and an adjustable cam keep system

16mm square ends ensure a clean finish

Compatible with shoot bolt systems for added security

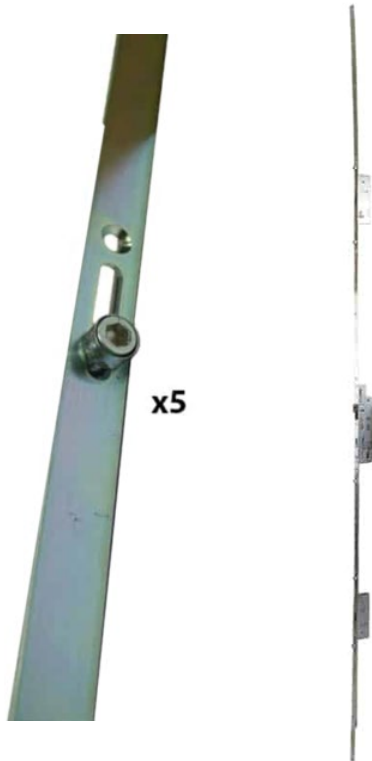

High-Security Multi-Point Lock

This high-security multi-point lock is specifically designed for PVCu doors, offering enhanced protection through its robust locking system. It features top and bottom hooks with anti-lift bolts, providing additional reinforcement against forced entry. The inclusion of a centre hook further strengthens the locking mechanism, ensuring maximum security. With dual spindle options of 92-92mm and 92-62mm handle centres, it accommodates various door configurations, making it a versatile choice for both new installations and replacements. The reversible latch simplifies fitting, allowing for easy installation regardless of door orientation. Additionally, the lock is compatible with shoot bolt systems, further enhancing its overall locking strength and reliability. Built for smooth operation and user convenience, this lock incorporates five rollers below the centre case, ensuring effortless door movement and secure engagement. The adjustable cam keeps, available in XLK5R623 and XLK5L623 models, provide precise fitting to accommodate different door specifications.

Designed for a simple and hassle-free installation process, this lock features 16mm square ends, giving the door a clean and modern aesthetic. Whether for residential or commercial use, this multi-point lock delivers a balance of security, functionality, and sleek design, making it an excellent choice for those seeking both durability and ease of use.
