

Concealed Window Restrictor

Suitable for PVC-u, Aluminium and Timber Windows

Quick and easy installation

Durable Stainless-Steel construction

Ensures controlled ventilation whilst preventing unauthorised window opening

Short arm design with stud plate

Secure & Durable Window Restrictor

The Concealed Window Restrictor features a short arm design with a stud plate, ensuring seamless integration with various window types while enhancing security. It is suitable for PVC-u, Aluminium, and Timber windows, making it a versatile choice for homeowners looking to improve safety without compromising aesthetics. The restrictor helps prevent unauthorised access while still allowing for controlled ventilation, providing peace of mind for families and property owners.

Designed for ease of use, the spring-loaded, releasable arm ensures effortless operation while maintaining security. Its self-engaging mechanism makes installation quick and hassle-free, eliminating the need for complex fittings. Crafted from durable stainless steel, this restrictor offers exceptional longevity and resilience against daily wear and tear, ensuring long-term reliability and protection for any home.
