Affordable and high-quality

Inline design suits left and right-hand use

With a key-locking mechanism and push-button operation, for enhanced security

Complete with accessories

Includes five spindle lengths and fixing screws to suit various needs

Part of the uPVC Hardware Range

The Window Espag Handle Repair Kit offers a high-quality and cost-effective solution for repairing, retrofitting, and maintaining window handles. Designed for convenience, this kit provides an affordable alternative to full handle replacements while ensuring durability and functionality. It features an inline handle that is universally compatible with both left and right-hand applications, making it a versatile choice for various window types. Additionally, its key-locking mechanism with a push-button operation enhances security, offering peace of mind by preventing unauthorised access. For added flexibility, the kit includes five spindle lengths (10mm, 15mm, 20mm, 30mm, and 40mm), allowing users to match the handle to their specific window requirements. It also comes with all necessary fixing screws, ensuring a hassle-free installation process.

With an industry-standard 43mm fixing centre, this repair kit is compatible with most Espag handles, making replacement simple and efficient. Each kit is complete with essential accessories, including a key and screw cap cover, ensuring a professional and secure finish. Whether for routine maintenance, refurbishment projects, or urgent repairs, this comprehensive kit provides a reliable and practical solution, making it an ideal choice for homeowners, landlords, and tradespeople alike.
