Standards & Testing

Intelligent Hardware Commercial Range is a selection of quality products developed by Intelligent Hardware to meet the growing need for performance at a competitive price. We are pleased to introduce a range of new levers in a variety of finishes to ensure you can find the right product to meet your needs.

BS EN Performance standards

Many of the product types within the Commercial range have been developed specifically to meet or exceed the latest European Standards.

CE Marking

Where CE marking is permitted, items are marked with the CE icon and the classification is indicated against each item where this is appropriate.

Declaration of Performance (DoP)

The Declaration of Performance is a key part of the Construction Products Regulation. It provides information on the performance of a product. Each construction product covered by a European harmonised standard or for which a European Technical Assessment has been issued needs this Declaration and has to be CE marked.

Fire Testing

This icon indicates the items have been successfully included in fire tests. Please contact Intellignet Hardware for full details of the certification.

Equality Act, AD M & BS 8300

The principal of ensuring buildings are accessible to able and less able people alike is manifest in Approved Document M of the Building Regulations and with further guidance in BS 8300. The disabled symbol is used throughout this document to identify those Commercial Range items which meet these requirements.
