

Kinetica+ K4 3* Kitemarked

Horizontal Euro Cylinder

Full keyed alike and mastersuite services available

Does not use trap pins so no danger of cylinder entrapment

Unrestricted keyway, easier for customers to get keys cut

3 Bio keys have antibacterial and antiviral properties and have been tested to ISO 22196:2011 and ISO 21702: 2019

Has 6 dimple pins and 5 laser track side pins

Game Changing Lock

Next time you change a lock, make it a game changing one. With the multi-award winning, multi-patented safety features of the Fullex Kinetica+ K4 Horizontal. Thanks to its advanced technology and unrivalled built-in performance at every turn, it takes security, safety, hygiene and easy-fit functionality to a whole new level. At the heart of the cylinder's advanced defence capability lies an ingenious cam system that delivers a new kind of security. 3 Bio keys have antibacterial and antiviral properties. Bio keys have been tested to ISO 22196:2011 and shown to reduce *Staphylococcus aureus* and *Escherichia coli* and to ISO 21702:2019 and shown to reduce SARS-CoV-2.

£4,000 ANTI-BURGLARY GUARANTEE

UAP offer up to a £4,000 cylinder guarantee on their 3-star cylinders. The anti-burglar guarantee means that if a home gets broken into via the lock, and a homeowner has a UAP 3-star cylinder installed, in the event that their insurance company won't pay out – UAP will consider a limited liability claim.

New Horizontal Keyway

A new horizontal version of our industry leading Kinetica+ K4 3-star cylinder. As an additional security measure, the Kinetica+ K4 Horizontal cylinder has been designed to allow only single-orientation key insertion. This has enabled the in-house UAP design team to create a smaller keyway, making it even harder to attack. The new horizontal keyway has six dimple pins and five laser track side pins, creating the potential for over 13 million differs, and making the lock even more difficult to pick.

The Kinetica+ K4 Horizontal 3* Kitemarked euro cylinder utilises UAP's patented timing pin system, and at the same time combines the Fullex anti-snap solution in a very effective product - financially making huge sense for the fabricator. The Fullex anti-tilt mechanism on the Kinetica+ cylinder is a very clever and a simple notion that they have a patent pending for. Basically, in normal anti-snap cylinders once a cylinder is snapped at the outside end, the inner section is heavier and will tilt allowing the burglar a small gap to gain access to the bolt.

- It can be master keyed but it is limited so only available on smaller projects
- Over 13 milion+ different key combinations!

ANTI-BUMP

The cylinder has a unique and patented anti-bump system which does not use trap pins. This system makes the turning of the cylinder key extra smooth

ANTI-DRILL

Hardened steel anti-drill pins are in each side of the cylinder. Plus all moving pins are nickel plated hardened steel 50 HRC minimum.

ANTI-PICK

Anti-pick pins in each side of the cylinder makes it extremely difficult for a common burglar to pick the cylinder.
