- Suitable for various door installations

Durable and Reliable Butt Hinge

The Intelligent Hardware Butt-Type Hinges are expertly crafted to provide a secure and stable door fitting, making them an ideal choice for a variety of door installations in both residential and commercial settings. Measuring 49mm x 75mm, these traditional butt hinges offer a versatile and reliable solution, ensuring doors remain firmly in place while allowing for smooth and controlled movement. Their high-grade steel construction guarantees exceptional strength and durability, making them resistant to bending, warping, or breaking under regular use. Designed with precision, these hinges reduce friction between moving parts, ensuring long-lasting efficiency and a silent, seamless operation that enhances the overall door mechanism. For added convenience, these hinges come complete with all necessary fixing screws, allowing for a straightforward and hassle-free installation without the need for additional hardware.

One of the most impressive features is the lifetime coating guarantee, which offers unmatched protection against rust, corrosion, and everyday wear and tear. This ensures that the hinges retain their sleek appearance and structural integrity over time, even in high-traffic areas or environments exposed to moisture.
