Protects those at-risk or those self-isolating

Ultimate protection against rogue traders and bogus callers

Acts as a visual deterrent to would-be criminals

30 minutes fire rated on timber and Nan Ya composite doors

Ideal for elderly and vulnerable people

What are contactless entry slots?

In these unprecedented times, UAP Isolating Contactless Entry Slots are helping protect those at-risk or those self-isolating at home by allowing an easy way to pass small items such as shopping lists and prescriptions from either side of the door without the need to open it and expose people on either side to the potential risk of COVID-19. A homeowner simply lifts up the sliding latch of the slot from the inside to pass and receive items into their home contact-free, and puts the latch back down after use. Isolating Contactless Entry Slots also double as the ultimate security accessory for protection against rogue traders and bogus callers as they also allow the passing of ID cards or other materials so the home occupier can check the ID of a caller without having to open the door and have the caller standing in the doorway. This removes awkward fumbling that occurs when trying to pass ID through the letterbox and allows it be thoroughly checked. The slots also act as a visual deterrent to would-be criminals, showing them that the home is aware of and prepared for bogus callers. Zinc based Isolating Contactless Entry Slots (black, white, polished gold and polished chrome) are salt spray tested to ASTM B117 for 480 hours and comes with a five-year inland guarantee.

Benefits

The PVD gold and mirror polished Isolating Contactless Entry Slots are made from 304 grade stainless steel, and is part of the UAP Nanocoast range. The UAP Nanocoast range of products are specifically designed for areas which are within a 25 mile radius of the coast, or within 5 miles of highly populated industrial areas. The identity card slot have been salt spray tested to ASTM B117 for 2,000 hours, and comes with an industry first LIFETIME coating guarantee, as the products will not pit, rust or corrode no matter what environments you put them in!
