

UAP Sliding Door Chains

Door Security

1 Hour Fire Rated

Narrow door chain style

Made from high grade steel

Individually machine welded links makes the chains extra strong

Exceeds breaking forces of over 2kN (200Kg)

Suitable for every type and door size

Available in 3 different finishes

Why Choose the UAP Sliding Door Chain?

Improving door security requires protection not only against break-ins while homeowners are away but also protection from intruders knocking at the front door. The impressive UAP sliding door chains are the perfect choice for all.

The UAP sliding door chains are made from high grade steel and what makes it stand apart from other door chains is that it can exceed a breaking force of over 2kN (200Kg). This is achieved by each link in the door chain being individually machine welded, providing additional strength and resilience to forced entry!

Other accessories

To compliment the door chains, we have also developed hollow wall anchors. Hollow wall anchors are used to fix the screws into the plastic door frame to get a good, solid fix. The reason these are needed is because a door frame maybe 2mm thick, so there is not enough material for the screws to grip. These are especially needed when fixing many products such as door chains etc. into thick skins of uPVC panels or composite door skins.

Unlike other wall fixings, we adjusted the grip spike to get a good fix, but not making it too big so that it can shatter or crack plastic. We then specified counter sunk bolts in either Brass or Chrome, so they suit most colour by volume, and fits into our counter sunk furniture. Each pack comes with 6 fixings and plated bolts.

Product codes:

Finish	Product Code	Material Construction	Guarantee
Polished Brass	DCB	Steel	2 Years
Polished Chrome	DCCH	Steel	2 Years
Satin Silver	DCSS	Steel	2 Years

Technical Info:

Door Chain Length	230mm
Number of Links	11 Links
Link Thickness	3mm
Link Width	12mm
Receiver Plate Length	84mm
Receiver Plate Width	37mm
Chain Holder Length	50mm
Chain Holder Width	17mm
Material	Steel
