

KINETICA + K4

PAS24 tested, Secured By Design Approved and EN1303:2015 certified

No authorisation required for local key cutting

Tested to ISO 21702:2019, the bio keys are proven to reduce SARS-CoV-2

Equipped with multi-patented safety features

Six-pin configuration as standard for enhanced security

Part of the Nanocoast Range

KINETICA cylinders are designed to provide unparalleled security and safety, having been successfully tested on a variety of PAS24 doorsets. Equipped with multi-patented safety features, they offer advanced defence capabilities through an ingenious cam system that ensures next-level protection. The cylinders meet the highest security standards, including EN1303:2015 certification, and are Secured by Design approved for added peace of mind. Featuring a six-pin configuration as standard, they provide enhanced security while also being resistant to picking, bumping, and drilling. The unrestricted key section allows local key duplication without the need for authorisation, adding convenience without compromising security. Available in multiple configurations, including Euro Double (Key/Key) and Euro Key & Turn, both starting at 70mm with 5mm increments and various offset sizes, they cater to a wide range of door types and installations. Additionally, the cylinders can be suited with Milos 100 for increased flexibility and customisation. It also prioritise hygiene and accessibility alongside security. The Bio Key, which comes as standard, is infused with antibacterial and antiviral properties tested to ISO 22196:2011, effectively reducing bacteria such as *Staphylococcus aureus* and *Escherichia coli*.

The cylinders have been tested to ISO 21702:2019, proving its ability to reduce SARS-CoV-2, making it an ideal choice for hygiene-conscious environments. Accessibility is further enhanced with the "ACCESS Bio Grip" and "TRIANGLE" turn options, specifically designed for individuals with restricted hand or finger movement. Available in a variety of finishes, including satin nickel, brass, polished chrome, and black, these cylinders combine security, hygiene, and aesthetics to suit diverse requirements.
