

UAP Pad Door Handle

62/92 Split Spindle

243 mm backplate

High quality
designed handle

Tube handle gives
a very comfortable
grip when operating

About the Handle

Designed for comfort and ease of operation, the UAP Pad front door handle has a 243mm long backplate, offering a high-quality designed front door handle. Each front door handle has a pad shaped external handle. Handles are non-handed and can be used as either a left or right hand, allowing it to fit a range of profiles. The Pad front door handle is available in two finishes White and Black. The handles are made from Aluminium and comes with a 5-year colour fast guarantee.

The Split Spindle Pad

The UAP split spindle pad handle can be used on UPVC, timber or composite doors as long as the lock within the door is suitable. Lever/Pad handles are for split spindle locks, also known as split follower locks. Lever pad handles have offset handles operating independently from each other on opposite sides of the door using two offset spindles. The external pad handle does not allow the latch to be withdrawn or the door to be opened from outside without the use of a key. This would prevent unauthorised access from outside if you have not fully locked your door. An example of this would be if you have just closed but not locked the door when bringing in you're shopping.

62/92mm Centres Split
Spindle Lever/Pad

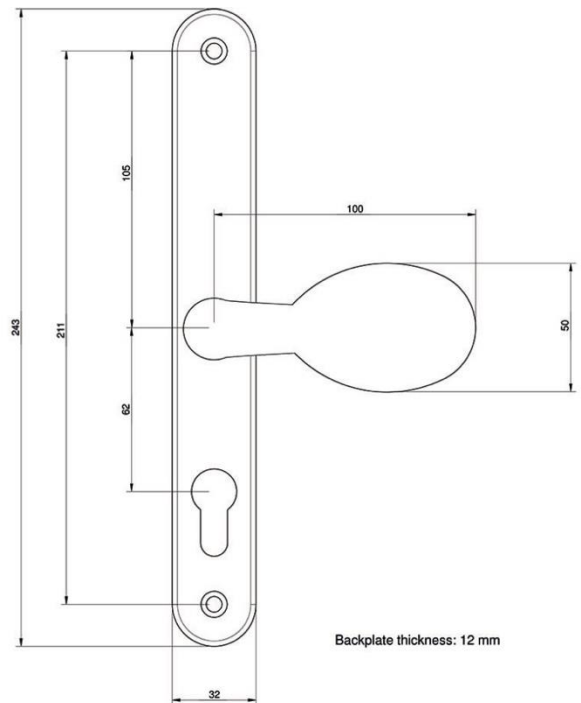

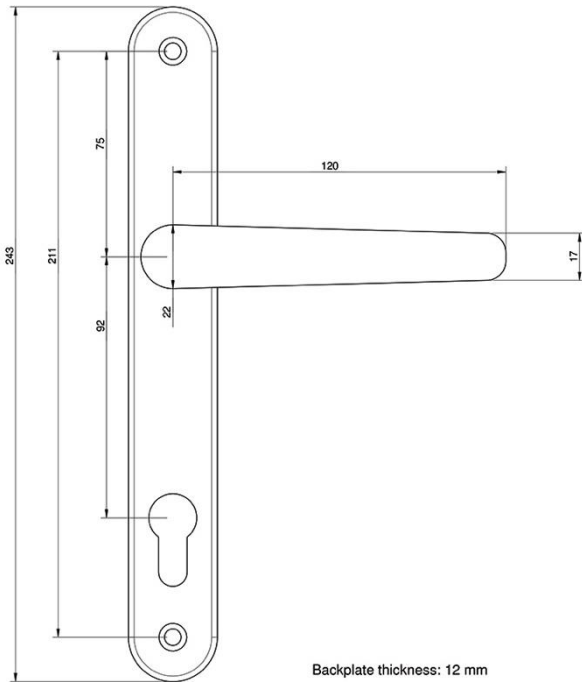

Has a 243mm long
backplate

Each handle comes with
