

UAP High Security 219mm

Aluminium 219 mm backplate

Has a 219mm short backplate

High quality, ergonomically designed handle

Attack Resistance and easy fitting with self-adhesive tabs

Water penetration resistance aided by the self-adhesive tabs

Cylinder and handle snapping protection

High Security Handle

The high security front door handle contains many security features not found in other high security door handles, including:

- 1 - Anti-Drill Resistance** - The integrated cylinder guard helps protect your door from drilling attacks. The blind cylinder end only makes the plug of the cylinder visible, helping to protect the pins inside from being drilled.
- 2 - Easy Fitting and Attack Resistance** - The self-adhesive tabs ensure not only easy and secure fitting also further strengthen the door handle against possible attacks
- 3 - Water Penetration Resistance** - The self-adhesive tabs also aid in preventing water from penetrating between the door and handle, thus preventing corrosion, discoloration, and premature aging
- 4 - Cylinder and Handle Snapping Protection** - Once fitted onto the door, the door handle is developed so as to help protect from the most common break in methods, cylinder snapping and handle snapping

About the Handle

The UAP high security front door handle has a 219mm short backplate and is aimed at the fabricator who wants to offer a high quality, ergonomically shaped and designed door handle range but who doesn't want to get involved in fitting a cylinder guard. This fit and forget handle is packed with state of the art features and can be used by the professional installer offering a security upgrade service. The front door handle can be sprung and unsprung, as the spring inside can be easily removed. Gold anodised, silver anodised, black and white front door handles are made from aero-space grade aluminium and come with a 10 years colour fast coating guarantee.
