Innovative Door Knocker

The 6-inch Victorian Urn Hidden Fix Door Knocker from UAP has a super-strong, waterproof adhesive covering, so fixing a door knocker has never been so simple. It is a Patented, innovative and original product, which makes it highly desirable amongst customers looking for something affordable, cost-effective and durable. Demand for a Hidden Fix Door Knocker has increased substantially in the last few years, as it eliminates the requirement for drilling, bolting and measuring. Hidden Fix Door Knockers are easy to install and are used extensively in composite doors. Producing these high-quality Hidden Fix Door Knockers has been met with meticulous and careful attention to detail.

No Drill Required

This innovative Hidden Fix design completely removes the requirement to drill through the door, resulting in a far smoother and cleaner look on the inside. The risk of rot and water permeation is also eradicated, meaning call outs for remedial work on liable water damage will not be necessary. With the correct implementation, Hidden Fix Door Knockers can also be removed with ease and efficiency, leaving no damage to the door.

Maximum Protection

Every Hidden Fix Door Knocker comprises of a 'lollipop', which is fitted onto a door with two small screws. The screw fixings are surrounded by a high quality, self-adhesive, closed cell foam tape which helps location of the 'lollipop' and prevents water from seeping into the door. The Hidden Fix Door Knocker has been designed so that when the 'lollipop' has been secured to the door, the Victorian urn door knocker simply clicks onto the lollipop to secure it into place. The Victorian urn also has self-adhesive tape on the back, to secure it further. Once the door knocker body is attached to the 'lollipop', we recommend you leave the self-adhesive tape to set for 24 hours before trying to pull it off. Once set, it becomes extremely secure and cannot be pulled off the door as the self-adhesive backing adds extra security and durability, as well as preventing water ingress.
